

Please do not allow the banking industry to weaken the excellent No Call List legislation in the State of Indiana. We have a wonderful system here that significantly reduced the number of nuisance telemarketing calls. My family and I truly appreciate Mr. Carter's excellent work and re-elected him to continue along this path. If we wish to contact one of our regular business contacts, we are capable of dialing the phone. The banking industry could better place its phone contact persons at the teller window to provide service to customers.

Thank you for considering our comments.
